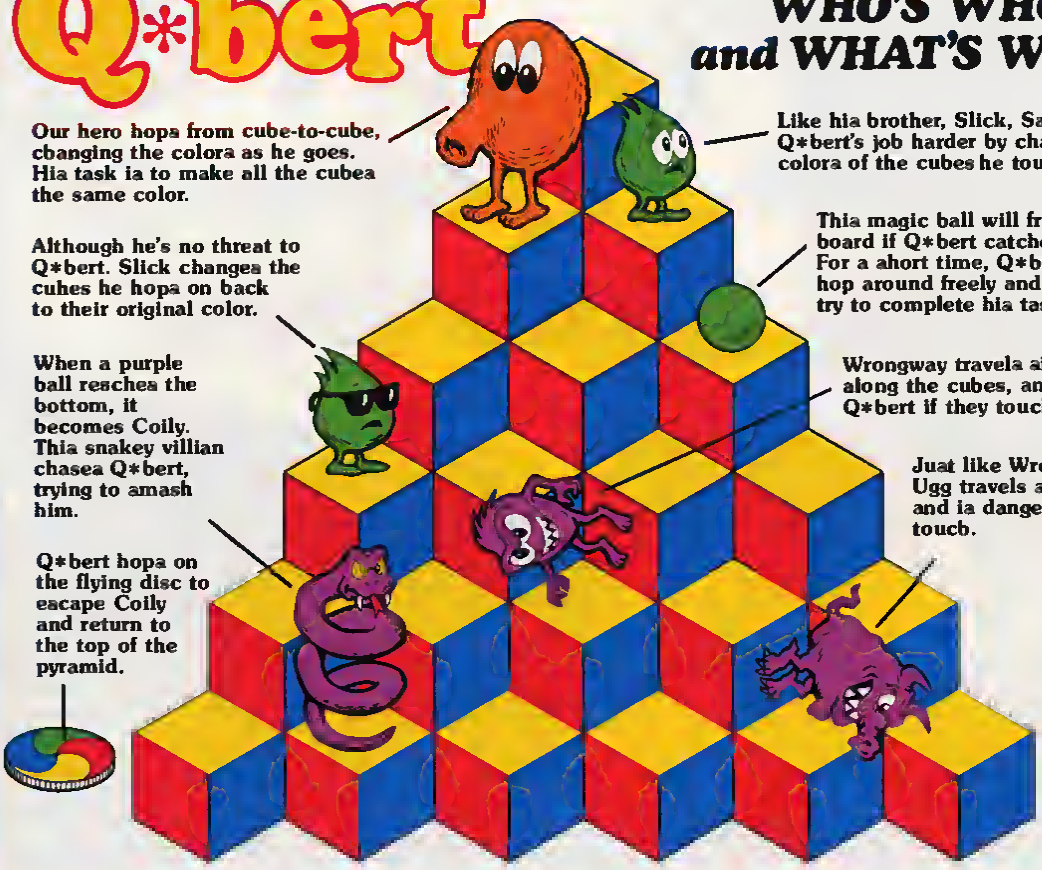
Q*bert™

WHO'S WHO and WHAT'S WHAT



Our hero hops from cube-to-cube, changing the colors as he goes. His task is to make all the cubes the same color.

Like his brother, Slick, Sam makes Q*bert's job harder by changing the colors of the cubes he touches.

Although he's no threat to Q*bert, Slick changes the cubes he hops on back to their original color.

This magic ball will freeze the board if Q*bert catches it. For a short time, Q*bert can hop around freely and try to complete his task.

When a purple ball reaches the bottom, it becomes Coily. This snakey villian chases Q*bert, trying to smash him.

Wrongway travels sideways along the cubes, and stops Q*bert if they touch.

Just like Wrongway, Ugg travels sideways and is dangerous to touch.

Q*bert hops on the flying disc to escape Coily and return to the top of the pyramid.
